CASTLE Software's
School Island

Student Review and Assessment on the Internet

School Island® is a web site for students and teachers, providing content review and skill assessment activities for **Math**, **Science**, **Social Studies**, and **Language Arts**. Instant feedback and progress reports pinpoint a student's strengths and weaknesses. Teachers can monitor *School Island* usage by their students and even assign review sessions tailored to the needs of individual students. *School Island* is easily accessible from school, library, and home - wherever an Internet-connection is available.

- ❖ **School Island** allows your **students** to review, assess, and learn from any computer with an Internet connection.

- ❖ **School Island** allows your **teachers** to monitor student work, create targeted review assignments or tests, and tailor lesson plans to individual and class strengths or weaknesses.

- ❖ **School Island**'s short answer questions include **hints**, **reasons**, defined **vocabulary terms**, and printable **progress reports** for individual students or for a whole class.

For the Student

- ❖ Access from **any computer connected to the Internet** – at school, at the library, even at home – 24 hours per day.

- ❖ A large, constantly growing database of questions for courses in math, science, social studies, and language arts.

- ❖ The **Short Answer** activity allows students to work with field-tested questions to assess where additional study is required. Immediate instructional feedback is given to students in the form of **hints**, **reasons,** and fully defined **vocabulary** terms.

- ❖ **Reference Tables** (available for selected Math and Science courses) can be accessed while answering questions.

- ❖ Printable **Progress Reports** track individual assignment and cumulative session performance.

- ❖ **Vocabulary** and **Flash Card** activities allow students to review thousands of important vocabulary terms.

- ❖ **Constructed Response**, **DBQ**, and **Essay** activities (available for selected courses) help students to develop written response skills.

For the Teacher

- ❖ Monitor student activity.

- ❖ View progress reports for individual students, broken down into various categories.

- ❖ View assessment reports to quickly analyze the strengths and weaknesses of an entire class.

- ❖ Create, assign, and monitor targeted assignments that emphasize your choice of units, themes, difficulty levels, and question attributes to students who show weaknesses in specific areas.

- ❖ Create Vocabulary Worksheets and Flash Card sets for students.

- ❖ Choose from a large database of questions or create your own questions

For the Administrator

- ❖ Internet-based technology eliminates software installation, network administration, and maintenance.

- ❖ Easily access and track your school's usage of **School Island.**

- ❖ Flexible account management.

- ❖ Retrieve data for your own custom reports.

CASTLE Software's School Island
