## **WASHINGTON ATTACKED!!!**

### **Democracy is DEAD!**

Few survivors are expected to be found after the city was surprised by an attack. Numerous religious groups have claimed responsibility.

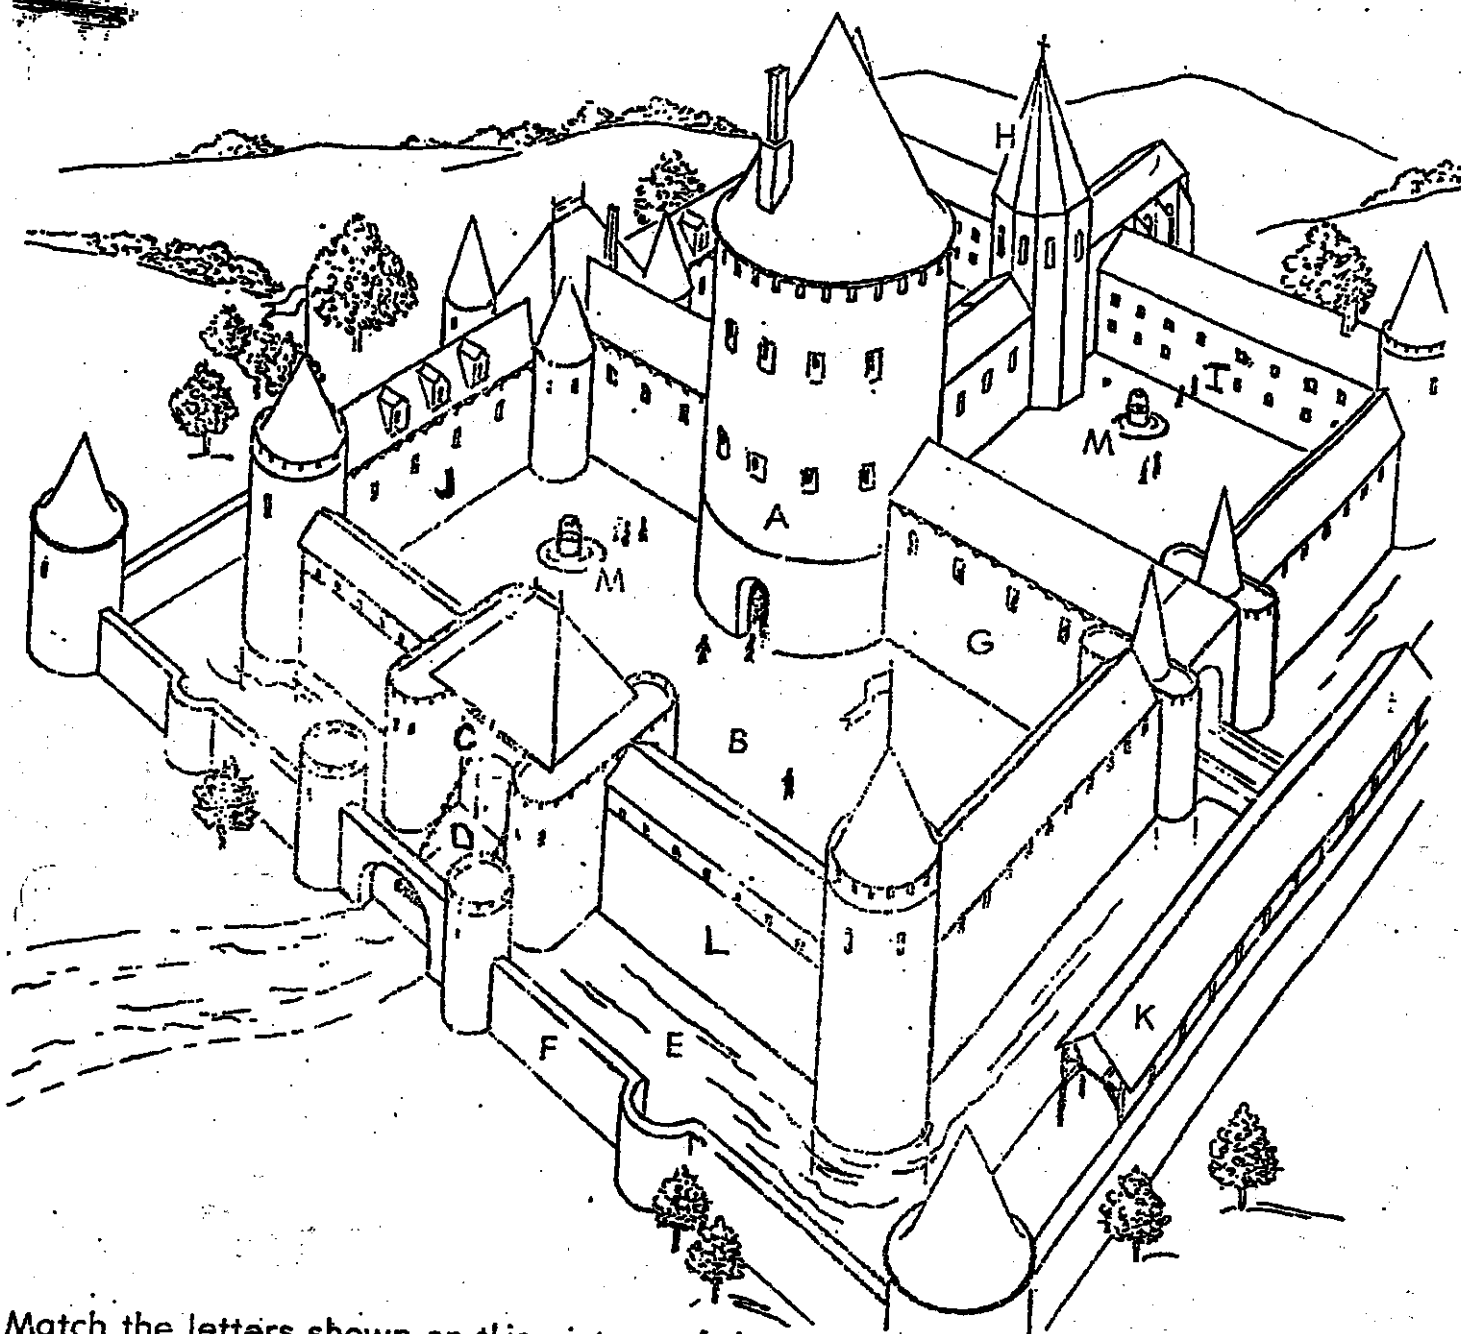

Every major office in the city has been destroyed. Many buildings, including the Capital, where the nation's leaders were working at the time of the attack, were blown up. There is no sign of the President or Vice-President. Many fear they are all dead.

As one observer stated, "The devastation of Washington has destroyed the United States, burnt its records, and ransacked its treasuries. We can no longer rely on the United States for finance, protection, or direction. We are all on our own."

Historic bridge leading to Arlington, Va. Is destroyed..

**Directions:** Read the headline story above. Think about what the citizens of the USA are experiencing without a government and laws. Pretend that you are one of the survivors. What would you need and who could you turn to in order to survive the anarchy and chaos? List the items that you would look for to survive.
