

Regents Living Environment

How to Make Your Own Castle Learning Review

Step 1: Log into Castle Learning

Step 2: Click on "Self Study"

Step 3: Select "Expert Mode", Select "Science", and Click on "Topics"

Step 4: Select "Biology/Living Environment" and "High School Level (9-12)". Click on the (+) sign to open a topic and select specific topics. Choose the number of questions. Give the assignment a title and click "OK".

The screenshot shows the 'New Activity for Science' interface. At the top, there is a red header with a back arrow and the text 'New Activity for Science'. Below the header, the interface is divided into several sections:

- Select a course:** A dropdown menu showing 'Biology/Living Environment' with a question mark icon to its right. This section is circled in red.
- Levels:** A dropdown menu showing 'High School (9-12)'. This section is circled in red.
- Select one or more topics:** A list of topics with checkboxes and plus signs to their left. The first item, 'Biology/Living Environment Topics', is selected. The other items are: 'The Unity and Diversity of Life', 'Genetics', 'Evolution', 'Reproduction and Development', 'Maintaining a Dynamic Equilibrium that Sustains Life', 'Ecology', 'The Impact of Humans on the Environment', and 'Laboratory Checklist'. This entire section is circled in red.
- Number of questions:** A dropdown menu showing '20'. This section is circled in red.
- Assignment Title:** An empty text input field. This section is circled in red.
- Buttons:** At the bottom left, there are two buttons: a green 'OK' button and a grey 'Cancel' button. Both are circled in red.

At the bottom of the interface, there is a note: '(Note: Actual question count may be less depending on selection options.)'

Step 5: Begin assignment.
