Dawn M. Springer, APRN, BC, FNP
School Nurse Practitioner

Dear Parents or Guardians,

A new New York State law allows students with **respiratory (breathing) conditions, allergies, and/or diabetes the right to independently carry and use their inhaled respiratory rescue medications; epinephrine auto-injectors; and insulin, glucagon, and related diabetes supplies** if the following is provided to the school:

1. written permission from the parent/guardian; and
2. written provider order with an attestation stating both the diagnosis, and that the student has demonstrated they can effectively administer the medication(s).

Independent carry and use of medications means that your child will take their own medicine without any help. The school will not know if your child takes their medicine. If you want your child to independently carry and use a medication listed above during the school day or at school sponsored events, you will need to ask their health care provider to put in writing (attest), that they have watched your child use the medication correctly. We may ask you to have your provider write another order with the required information if it not on the medication order you bring to school.

After review, students with other health conditions who need medications quickly during the school day or at school sponsored events may also be given permission to independently carry and use their medications if they provide the same written notes.

Sincerely,

Dawn M. Springer, FNP-BC

Medical Director
