

Frontier Fishing Club

Advisors:

Daniel Mascio

Fred Carstens

The Frontier Fishing Club is a new club in the 2023 - 2024 school year. The club plans to meet after school monthly. During these meetings, students will learn about local fish species and fishing tactics. The club welcomes both novice and experienced anglers.

The club also plans to take students to local waterways to implement the skills they learn. Some of the first trips to local waterways may occur on weekends in which students would be dropped off and picked up by a parent or guardian.

At this time, the club will communicate with students and parents via the schools daily announcements and google classroom. Students and parents can join google classroom with the following code: **btg7jb**
